

Notes

Use this space to record additional species, unusual bird activity, or use drawing to describe field marks of rare or unusual birds (size, shape, bill, plumage, color patterns, etc.).

Bird List

For
Hunt Hill
Audubon Sanctuary

Observer _____

Date _____

This checklist represents the current knowledge of what birds pass through and reside here, and has been gathered by staff and observers such as yourself. By no means is it complete, and we invite you to share any new observations you make.

Water birds are listed first, and perching birds are found towards the end. Following each species are listed habitat types in which one is most likely to see the species, and the time of year the bird is generally present.

P = Prairie

F = Forest

M = Migrant

L = Lake

B = Bog

S = Summer

Y = Year-round

****Please Note****

Hunt Hill consists of diverse habitats in close proximity to one another, therefore, birds normally found in certain habitats may be found elsewhere.
